

Secure plastic face in sign cabinet by adding a retaining screw:

1. While pressing in at the center of the face **(A)**
drill a hole in the center of the retainer at the top of the sign **(B)**
through the retainer and the lip of the face behind it **(C)**
2. Insert a stainless steel (or equivalent) 3/8" sheet metal screw into
the newly drilled hole through the face into the back flange **(D)**
3. Repeat on other side of sign (if double faced)

Thank you.
